

Top Machine Learning Books

1. Hands-On Machine Learning with Scikit-Learn, Keras, and TensorFlow

Author: Aurélien Géron

A practical ML book with Python examples using Scikit-Learn, Keras, and TensorFlow. Best for beginners and intermediate learners.

2. The Hundred-Page Machine Learning Book

Author: Andriy Burkov

A short and simple guide covering major Machine Learning concepts in an easy format.

3. Pattern Recognition and Machine Learning

Author: Christopher M. Bishop

A theory-focused book explaining probability, statistics, and ML algorithms in depth.

4. Deep Learning

Authors: Ian Goodfellow, Yoshua Bengio, Aaron Courville

One of the best books for learning neural networks and Deep Learning concepts.

5. Machine Learning Yearning

Author: Andrew Ng

Focuses on practical strategies for building real-world ML systems and projects.

6. Introduction to Machine Learning with Python

Authors: Andreas C. Müller and Sarah Guido

A beginner-friendly introduction to ML using Python and Scikit-Learn.

7. Python Machine Learning

Author: Sebastian Raschka

Explains Machine Learning and Deep Learning techniques with Python examples.

8. Artificial Intelligence: A Modern Approach

Authors: Stuart Russell and Peter Norvig

A famous AI textbook covering Machine Learning, search algorithms, and intelligent systems.

9. Data Mining: Practical Machine Learning Tools and Techniques

Authors: Ian H. Witten, Eibe Frank, and Mark A. Hall

Covers data mining techniques and practical ML tools for analysis and prediction.

10. Understanding Machine Learning: From Theory to Algorithms

Authors: Shai Shalev-Shwartz and Shai Ben-David

A detailed book explaining the theoretical foundations of Machine Learning algorithms.
